# How the Data Center News Gets Made

*Kaz suggests. David decides.*

KAZ does the legwork  DAVID makes the decisions

**1** **Monday evening — Gathers the news** — KAZ

Kaz reads the week's Pennsylvania data-center news and makes a short list of 8 candidate stories.

**2** **Monday night — Picks the stories** — DAVID

David reads the list and chooses the 4 stories his readers should see.

**3** **Tuesday morning — Writes the newsletter** — KAZ

Kaz writes plain summaries of the 4 stories and lays out the one-page newsletter.

**4** **Tuesday by 9 AM — Checks and approves** — DAVID

David reads the draft, asks for any fixes, and approves the final version by noon.

**5** **Tuesday — Sends it himself** — DAVID

David emails the newsletter to his readers from his own account.

---

## Nothing goes out unless David says so.

Kaz is a computer helper David uses. David is always in charge.
